

# Gabe Siringoringo

Software Engineer | Backend & Full-Stack (Rust, WebAssembly)

Medan, Indonesia | gaberingo12@gmail.com | +62 813 5817 8843

Portfolio: gavhari.github.io/gabe-portfolio | GitHub: github.com/gavhari | LinkedIn: linkedin.com/in/gabe-siringoringo-a827aa16b

## PROFESSIONAL SUMMARY

Software engineer building fast, reliable systems for the web with Rust and WebAssembly, backed by over three years of professional experience developing and maintaining enterprise ERP systems on the Odoo framework. Actively working with AI development tools and LLM frameworks, including AI coding agents, LangChain, and the Model Context Protocol (MCP), to build and automate software workflows. Applying to the Apple Developer Academy to expand into application development and grow into a well-rounded developer capable of taking an idea through to a shipped product.

## TECHNICAL SKILLS

**Languages:** Python, Rust, SQL, JavaScript, HTML, CSS

**Frameworks and Tools:** Odoo, Actix-web, SQLx, Yew (WebAssembly), Redis Streams

**Databases and Platforms:** PostgreSQL, Linux, Git, Docker

**AI Tools and LLM:** AI coding agents (Claude Code), LangChain, Model Context Protocol (MCP), tool/function calling, agent configuration, prompt engineering

**Core Competencies:** ERP customization, module development, debugging, system maintenance, end-to-end development, fast self-learning

## PROFESSIONAL EXPERIENCE

### ERP Developer — HashMicro

Jakarta, Indonesia (Remote) | June 2024 – Present

- Develop and maintain modules for an Odoo-based enterprise ERP system used by clients across multiple industries.
- Customize and extend existing modules, build new features for client workflows, fix bugs, and handle ongoing system maintenance and updates.

### ERP Software Engineer — PT Witech Inovasi Indonesia

Medan, Indonesia | March 2023 – June 2024

- Delivered Odoo implementation and customization projects tailored to client business requirements.
- Led an Odoo migration from version 15 to version 17, adapting existing customizations to the newer version.

## PROJECTS

### Multi-Seller Marketplace Platform (Self-Directed)

Rust, Actix-web, SQLx, Redis Streams, Yew/WebAssembly, PostgreSQL | 2025 – Present

- Building a full multi-vendor e-commerce platform end to end, including a backend API, an event-driven order pipeline, and a WebAssembly frontend.
- Implemented reliable stock reservation and idempotent payment handling to prevent overselling and duplicate charges.

### AI Agent Configuration and Tooling (Self-Directed)

Claude Code, LangChain, Model Context Protocol (MCP) | 2025 – Present

- Integrated AI coding agents (Claude Code) into development workflows to automate software tasks, built structured agent instruction frameworks, connected external tools and data to LLMs via MCP, and explored LangChain agent patterns including tool/function calling.

### Automatic Parking System Using Computer Vision (Undergraduate Thesis)

Brawijaya University | 2023

- Designed a computer-vision system that detects and manages parking spaces automatically.

## EDUCATION

### Bachelor of Computer Engineering — Brawijaya University

Malang, Indonesia | 2018 – 2023 | GPA 3.39 / 4.00

## CERTIFICATIONS

AI for Junior Developer, Fresh Graduate Academy (DTS), 2022; TensorFlow for AI, ML & Deep Learning, Coursera, 2020

## LANGUAGES

Bahasa Indonesia (Native); English (Professional working proficiency)
